Versatile Front-end Developer with 2+ years creating web and mobile applications.Team player with an eye for detail. Proficient in HTML, CSS, JavaScript and modern libraries and frameworks. Seeking a position to challenge and progress my skills in web development.

Skills

- JavaScript/HTML/CSS
- React

- Sass/Bootstrap/jQuery
- Node.js/Express/ SQL

- Source Version Control
- Cross-browser compatibility

Work Experience

QA Intern - Internet Brands Inc. | El Segundo, CA   *Jul 2018 - Nov. 2018*

- Creating and executing tests of mobile and web applications.
- Construct bug reports and provide clear instruction for bug reproduction.
- Interfacing with project managers, programmers and QA engineers to confirm known/unknown issues.

Manufacturing Technician - Sotera Wireless | San Diego, CA   *Jul 2015 - Aug. 2017*

- Build and test various devices according to manufacturing specifications.
- Participate and lead training in various assembly/test process(es).

Projects

Employee Directory

- Utilized JavaScript's fetch method to generate an employee directory using "randomuser" API.
- Created scalable and mantainable CSS files with SASS.
    - Technologies used: *AJAX/SASS/ES6 JavaScript*

Library Database

- Used Sequelize to create a simple database management system for a small library with a simple SQLite database.
- Defined client endpoints using Express routing methods.
    - Technologies used: *Sequelize /Express/ SQLite*

Weather App

- React application designed to generate local weather data based on user's IP address.
- Sends AJAX requests to ipStack and DarkSky using axios to retrieve user's weather data.
    - Technologies used: *React/Axios*

Education

Front End Web Development Tech Degree - Team Treehouse

Built user experiences with industry-standard practices and tools used in front-end development.

BS - Management Information Systems - San Diego State University

Relevant Coursework:

Information Systems Design - Performed many of the SDLC phases in a simulated information-system group project.
E-Business Web Development - Built internet-based applications with database integration.
